Silverio Taglione

Manufacturing innovation | Industrial AI | Robotics

SHORT BIO

Silverio Taglione is an Italian industrial engineer and manufacturing innovation leader with 17+ years across Lean, engineering, production, quality, maintenance and digital transformation. His current work focuses on human-centered manufacturing, industrial AI, digital manufacturing and emerging robotics, connecting factory-floor reality with global innovation strategy.

TOPICS

- **Human-centered manufacturing**
- **Industrial AI in real factories**
- **Scaling pilots globally**
- **Humanoid robotics**
- **Industrial innovation strategy**

RESEARCH

Peer-reviewed work on passive shoulder exoskeletons

Applied Ergonomics (2022) and IEEE Transactions on Human-Machine Systems (2025).

FORMATS

Keynotes | Panels | University lectures | Podcasts | Executive workshops
